

EADHA ECO-ENERGY

A Short Rotation Forestry system to supply your sustainable woodfuel

- ✓ Generate income from the Renewable Heat Incentive;
- ✓ Conserve rare native trees;
- ✓ Improve the biodiversity value of your land;
- ✓ Support a local social enterprise providing vocational training in horticulture and traditional woodland management skills.

We provide a range of services including:

- Secure funding from our private sector partners to enable flexible design
- Ecological site survey
- Community engagement, training and education
- Site design to maximise productivity and biodiversity
- Supply of selected fast growing native aspen clones from our unique collection
- Fringe habitat creation using UKBAP species including juniper and willow scrub; pond creation
- Natural weed suppression by wildflower sowing
- Traditional woodland management
- Manual harvesting and coppicing
- Woodfuel processing on-site
